

bars

Bars, even if they remind us of more dangerous places, are an essential part of our sales outlet entrance and exit management system. Available in modular measurements, they are constructed in chrome plated steel with a thickness of 1.5 mm. -D40 mm. Barriers usually make use of two horizontal bars, but a series of uprights that allow the erections of three horizontal bar barriers is also available.

Chrome plated D40 bars
thick 1,5 mm
